INVESTMENT PROFESSIONALS

It Was All About Britain

The entire world was focused on Britannia this month as that Kansas sized nation pondered then voted on whether to exit from its 10 year membership in the EU. Before the UK can leave the EU it must invoke Article 50 of the Lisbon Treaty which never really envisioned anyone leaving – and didn't want to make it easy. But markets reacted much more quickly.

Not unexpectedly when the vote was counted, global markets reacted swiftly and violently. But, within a few days the financial markets return to a feeble stability may suggest that the exit is far less serious than predictions – at least economically. Even the US Treasury markets started to calm relatively quickly although they remain in very low rate territory. The run to US and Japanese sovereign debt eased within a week.

Alan Greenspan had noted that the exit might be one of the worst post-war history crises and indeed politically that could prove prophetic. Seemingly neither Brits nor the EU pols were prepared for the verdict and now no one wants to be in charge. The dysfunctional global leaders were little help in quieting markets. S&P stripped the UK of its AAA rating and then later reduced the EU global rating from AA+ to AA.

While this will remain a very fluid situation and will keep the Fed from moving to raise rates anytime soon, the panic has subsided. Even the US dollar, which would be a prime indicator of overall panic as funds move into the US for stability and rates and away from developed and emerging currencies, has slowly stabilized. Any permanent change will take months. Corporations and financial institutions with any large presence in the UK, will be the first to act most probably but such changes take months if not years to come to fruition. Change will be slow which will help the markets adjust.

On this side of the Atlantic the month did bring some positive news for the US economy. Factory activity picked up its pace and put it at the highest for the past year. ISM also exceeded expectations. All of this was helped by an increase in consumer spending built on an eight-month high in consumer confidence.

Q1 GDP growth was revised slightly higher at an annual rate of 1.1% (up from 0.8%) on the third estimate from the BEA. That is still rather lackluster but even small steps take us closer to the Fed's 2% target. The growth has been slowing over the last 3 quarters 3.9% (Q2), 2.0% (Q3) and 1.4% (Q4). All this suggests that the Brexit vote will not create a recession in the US. A much bigger hit would have to occur to trigger a contraction. The US economy is not highly dependent on Europe. The primary impact will be strength of the USD which slows US exports.

The US dollar reacts then settles as Brexit questions linger.

What Comes Next? Protracted Uncertainty

The Brexit vote could be another reason for the Federal Reserve to hold off raising rates, and few now expect rate changes until 2017. A rate cut on the other hand is also unlikely. The Fed and other central banks could be expected to ensure adequate liquidity in market participants, especially the larger globally systemically important banks as defined by Basel III. The Basel deadlines for achieving required liquidity are coming due at an appropriate time to control the situation. If the situation continues to worsen, the Fed could take some other action to prevent trouble including a renewal of the bond buying quantitative easing to increase money supplies.

A high degree of uncertainty exists as political and business leaders recognize that a massive and unpredictable effort is required to negotiate the UK's withdrawal within the 24-month timeline contemplated under Article 50. A global concern remains that many international corporations (including U.S. and China) invest in the U.K. partly so they can readily access the free-trade corridors with the rest of the European Union. The vote could see reduced profits for those companies.

The vote undermines the euro and international money has few choices for any rates which continues to press US down. Funds have also flown into Japanese markets which is perceived as safe. In addition, uncertainty will affect international loans thereby slowing growth. The strength in the USD also strengthened the Chinese so of course they weakened the Yuan to its lowest rate since August. No surprise there.

Meanwhile in this hemisphere, Puerto Rico boldly announced it will not be paying its Infrastructure Finance Authority amounting to \$246 million (at 8.25%). Bondholders have of course challenged the islands moratorium in court. Opening them up to protection has bad consequences written all over it for any states in trouble here in the US.

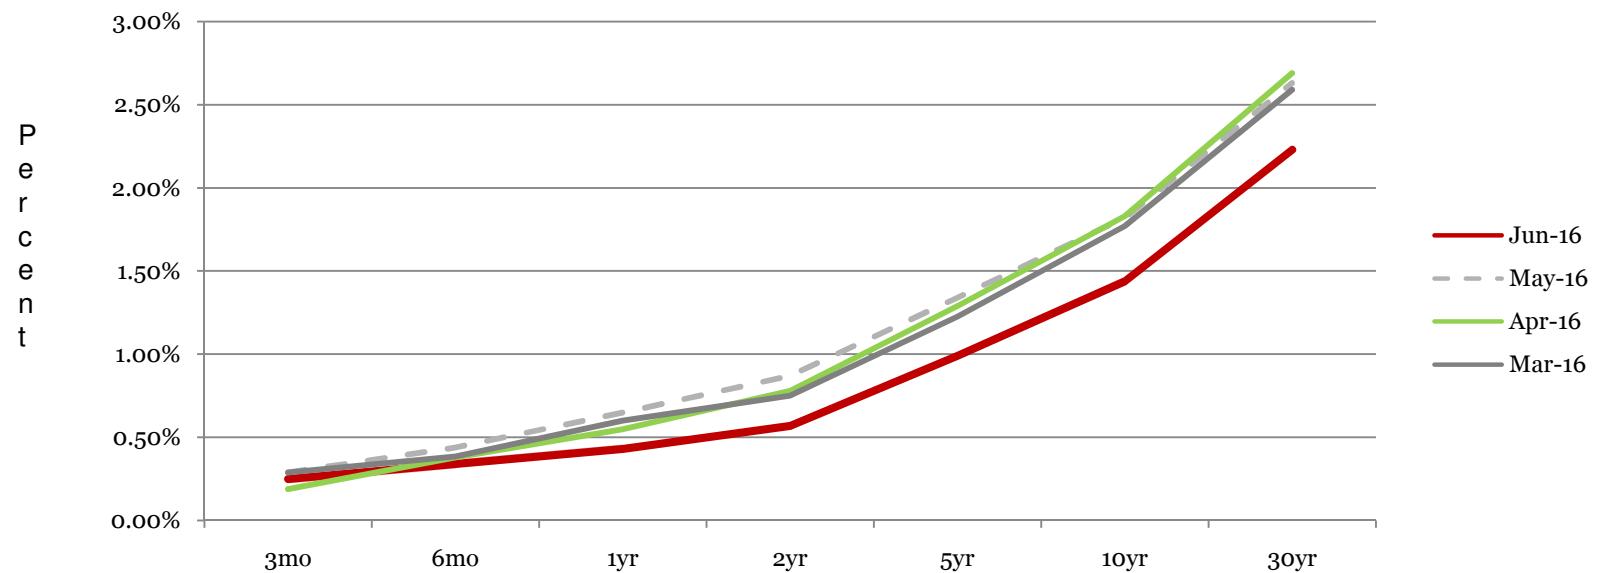

So, why did the British people vote to leave? Quite simply it is because the people of the U.K. felt the cost of EU membership far outweighed any worries about leaving. They don't care about the multinational corporations and investors at this point. They want control again not a ruling bureaucracy in Brussels. Allianz Chief Economic Adviser Mohamed El-Erian called the Brexit vote "historic and consequential". We have already seen that in spades. But until and if the UK formally leaves the EU, current law and obligations will continue. Unfortunately the global markets are getting anaesthetized to major shocks which roil us almost quarterly.

The turmoil of June will throw even more attention on employment indicators the first week in July.

Rates are Pummeled

- The impact of Brexit was apparent across the curve – dropping rates measurably and significantly.
- The shorter end had little room to move but as funds flew into the money market accounts and banks every point out to the one year dropped.
- The longer end with more room to move dropped precipitously with the Brexit panic.
- All considerations for a Fed increase has disappeared with some few optimists keeping hopes for a December hike alive. But the odds are on for no action until 2017.

End of Month Rates - Full Yield Curve – Fed Funds to 30yr

¹ WAM represents weighted average maturity.

² Change in Market Value is required data, but will primarily reflect the receipt and expenditure of the City's funds from quarter to quarter.

General Portfolio

As of June 30, 2016

- P&A constantly reviews your portfolio for optimal asset allocation and a controlled average maturity because a diversified portfolio can better adjust to volatile market conditions.
- The very short-term rates have moved up in the last quarter offering some opportunities for diversification – especially for those with access to commercial paper. Past one year there are many more alternatives as rates creep up.
- Banks remain *uninterested* in new deposits and municipal debt has become less attractive as the supply of new muni bonds dries up. Few outperform the agencies at this point in time.
- It is still time to reduce cash balances and stretch out longer and into the two year area if possible.
- The non-cash portion of your portfolio is yielding 0.83%.
